This Interim Report and Unaudited Financial Statements (the "Report and Accounts") may be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Report and Accounts. To the extent that there is any inconsistency between the English language Report and Accounts and the Report and Accounts in another language, the English language Report and Accounts will prevail, except to the extent (and only to the extent) that it is required by law of any jurisdiction where the shares are sold, that in an action based upon disclosure in a Report and Accounts in a language other than English, the language of the Report and Accounts on which such action is based shall prevail. Any disputes as to the terms of the Report and Accounts, regardless of the language of the Report and Accounts, shall be governed by and construed in accordance with the laws of Ireland.

Investment Managers' Report

Lazard Global Listed Infrastructure Equity Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Global Listed Infrastructure Equity Fund (the "Fund") returned 11.35%, net of fees and in sterling terms, against the MSCI World Core Infrastructure (GBP Hedged) Index, which returned 5.43%¹.

Market Review

Global equities posted strong gains in the six months to 30 September 2025, supported by easing tariff risks and a more accommodative monetary policy backdrop. After selling off in April on steep US import tax announcements, sentiment recovered as implementation was delayed, a US-China trade truce was reached, and trade agreements were signed with Japan and the EU. Subsequent tariff measures prompted only muted market reactions.

In monetary policy, the US Federal Reserve cut rates by 25 basis points in September, its first move of 2025, and signalled the potential for further easing. The European Central Bank lowered rates in April and June before pausing, while the Bank of England and several other European central banks also moved to ease policy.

Portfolio Review

What Contributed to Returns:

- US freight railroad CSX outperformed during the period, supported by the partial de-escalation of China-US trade tariffs, improved operating metrics and positive network developments.
- Spanish-based global Infrastructure owner and operator Ferrovial added to performance after reporting strong H1 2025 results.
- Italian gas utility Italgas continued its strong share price performance, driven by early signs of promising progress in the integration of 2iReteGas.

What Detracted from Returns:

- Owning French-based satellite operator Eutelsat was unhelpful. Its share price exhibited notable volatility during the period, retreating from the sharp gains seen in Q1.
- US-listed mobile tower operators Crown Castle and American Tower both weakened during the period.

Outlook

The combination of volatile equity markets and our conservative approach leads us to view current market conditions cautiously. We see pockets of attractive value opportunities, particularly in Europe. We have long cautioned investors about the valuation of the US utility sector and we have been underweight this sector for some time. While we remain cautious, we are beginning to see specific stock opportunities within the sector, which we may pursue in the months ahead.

Scarce valuation opportunities have led to a relatively concentrated portfolio where we believe the risk/return trade-off is favourable, however this brings a higher degree of stock-specific risk. In our opinion, the only way to generate returns that properly compensate for the risk taken is through highly selective stock-picking. We caution investors to expect increased volatility in the short-to-medium term. Value is emerging now and on a 5-year view, and valuations look more attractive on a risk/return basis. We believe returns available in the strategy look relatively attractive at this time when compared to a passive investment in infrastructure indices, bonds, or in broader equity markets. We believe the preferred infrastructure characteristics we seek for all our investments will continue to serve our investors well over the longer term.

All data contained herein is sourced by Lazard Asset Management Limited unless otherwise noted as at 30 September 2025.

Lazard Asset Management Pacific Co.
30 September 2025

Investment Managers' Report (continued)

Lazard Global Sustainable Equity Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Global Sustainable Equity Fund (the "Fund") returned 12.55%, net of fees and in US dollar terms, against the MSCI AC World Index, which returned 20.03%¹.

Market Review

Global equity markets rose over the period as concerns over tariff risk faded and expectations of a favourable shift in the global monetary landscape bolstered risk appetites among investors. After keeping US interest rates on hold for months, the Federal Reserve (the Fed) cut interest rates by 25 basis points in September. It cited rising downside risks to employment as it balanced a weakening US labour market against persistent inflation. The Fed signalled two additional rate cuts this year, but noting the 'challenging situation' it faces, warned that policy could shift quickly. Meanwhile, the European Central Bank kept eurozone interest rates unchanged at its September meeting, pointing to an improving outlook for economic growth and inflation in the region.

Portfolio Review

What Contributed to Returns:

- Owning Taiwan Semiconductor Manufacturing Company was helpful. As a leading semiconductor foundry, its share price rose on the back of solid sales figures attributed to strong demand driven by AI investment.
- Owning ASML, a Dutch company that supplies the world's leading chipmakers with the equipment to mass produce patterns on silicon wafers, was helpful. Its share price rose amid improved industry dynamics.

What Detracted from Returns:

- Owning US consumer health company Kenvue was unhelpful. Its share price fell after the US Department of Health and Human Services and President Trump raised concerns about the risks associated with taking its pain medication, Tylenol, during pregnancy.
- Owning information service providers RELX and Wolters Kluwer was unhelpful. Their shares underperformed as a read across after disappointing performance from rival research and advisory firm Gartner. Their results reignited the debate over the impact AI will have on information services companies.

Outlook

Quality as an investment style has materially underperformed the stock market over the recent past despite many holdings reporting solid earnings growth. This has posed a significant challenge to our style of investing. However, we continue to believe that high-quality companies will outperform over time and maintain conviction in our empirical studies covering over 30 years that support this. No style will work in every environment, but even after the recent challenging period, quality has historically outperformed many other equity styles over the long term.

While it is hard to identify what might lead to a turnaround for quality stocks, we believe that the fundamentals for high-quality companies remain attractive, while valuations are now also supportive following this sharp de-rating. We remain committed to owning the highest-quality companies globally.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2025.

Lazard Asset Management LLC
30 September 2025

Investment Managers' Report (continued)

Lazard Global Thematic Focus Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Global Thematic Focus Fund (the "Fund") returned 14.58%, net of fees and in US dollar terms, against the MSCI AC World Index, which returned 20.03%¹.

Market Review

Global equity markets posted strong gains over the past six months, overcoming trade policy volatility and geopolitical risks. The second quarter began with sharp sell-offs following broad US tariffs on Chinese goods, but optimism returned after a 90-day tariff pause and a US-China truce. By the third quarter, investor sentiment strengthened further, buoyed by AI enthusiasm and expectations for lower US interest rates. Trade tensions eased as deals with Japan and the EU were finalised, and even the US's August announcement of new import taxes on nearly 90 countries drew muted reactions, signaling investor resilience.

Central banks played a pivotal role in shaping market dynamics. The US Federal Reserve held rates steady through Q2 2025 but cut by 25 basis points in September, its first move of the year, citing rising employment risks and forecasting additional cuts. The European Central Bank neared the end of its easing cycle in Q2 before holding rates in Q3 amid improved eurozone growth. The Bank of England cut rates in August, while Asia saw mixed signals: the Bank of Japan maintained rates but raised inflation forecasts, and China held steady as exports surged and equities rallied.

Corporate earnings were mixed across regions. US companies consistently beat expectations, driving record highs for US equities. Europe lagged, constrained by limited AI exposure, while Japan rebounded in Q3 on tariff clarity after underperforming earlier. Chinese shares rallied late in the period as investors sought higher returns, and Hong Kong outperformed historical norms despite modest contractions. Emerging markets broadly outpaced developed peers across both quarters.

Sector trends remained consistent: information technology led gains, fuelled by AI-driven momentum, while defensive sectors like energy and consumer staples lagged amid a risk-on environment. Overall, optimism around trade moderation, robust earnings, and monetary policy shifts sustained market momentum despite lingering global uncertainties.

Portfolio Review

What Contributed to Returns:

- The best performing theme was 'Bits of Chips'. AI-related demand continued to fuel operating results of holdings in this theme, with Taiwan Semiconductor Manufacturing Company, NVIDIA, TE Connectivity, Broadcom and Marvell all outperforming.
- The 'Smart Capex' theme also contributed positively. Hexagon gained on optimism for its new CEO's strategy to accelerate organic growth. Mitsubishi Electric advanced as infrastructure and factory automation demand tailwinds and internal corporate reforms led to strong operating performance.

What Detracted from Returns:

- The 'Future Health' theme was the weakest performer. Regulatory uncertainty around healthcare policy represented a headwind for the theme, with Thermo Fisher, IQVIA, GE Healthcare and Danaher underperforming the most.
- 'Data and AI' theme saw mixed performance. Alphabet climbed after a favourable antitrust ruling. Elsewhere, negative sentiment on AI-based disruptive threats to data companies represented a broad headwind for the theme. Wolters Kluwer, London Stock Exchange Group, RELX, Intercontinental Exchange, S&P Global and Marsh & McLennan all declined.

Outlook

We believe markets face a pivotal moment in history, shaped by global disruption on a scale not seen in the modern era. AI and its multitude of potential applications are set to redefine the economic and geopolitical landscape. Through a disciplined valuation approach, diversification across multiple themes, and long-term investment horizon, the portfolio seeks to capture a broad set of opportunities. These include AI and applied AI to a healthcare revolution and strategic industrial capital cycle. The outcome, our view, is a portfolio positioned for the future at a critical and uncertain moment in markets.

Investment Managers' Report (continued)

Lazard Global Thematic Focus Fund (continued)

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2025.

¹ **Source:** Lazard Asset Management, NAV to NAV price, net income reinvested in US dollars, 'A' accumulation share class net of fees, to 30 September 2025.

Lazard Asset Management LLC
30 September 2025

Investment Managers' Report (continued)

Lazard Global Equity Advantage Fund

Investment Review

Over the six-month period ended 30 September 2025, the Lazard Global Equity Advantage Fund (the "Fund") returned 20.29% in US dollar terms, net of fees, against the MSCI All Country World Index, which returned 20.03%¹.

Market Review

Global equity markets rose over the period as concerns over tariff risk faded and expectations of a favourable shift in the global monetary landscape bolstered risk appetites among investors. After keeping US interest rates on hold for months, the Federal Reserve (the Fed) cut interest rates by 25 basis points in September. It cited rising downside risks to employment as it balanced a weakening US labour market against persistent inflation. The Fed signalled two additional rate cuts this year, but noting the 'challenging situation' it faces, warned that policy could shift quickly. Meanwhile, the European Central Bank kept eurozone interest rates unchanged at its September meeting, pointing to an improving outlook for economic growth and inflation in the region.

Portfolio Review

What Contributed to Returns:

- Owning Comfort Systems, a US-based building and service provider, was helpful. Its share price was boosted by its July earnings release as results exceeded expectations. The company delivered robust sales growth alongside improved operating margins, with same-store revenue growth accelerating from the prior quarter.
- Owning Taiwan Semiconductor Manufacturing Company was helpful. Its shares remain steady amid Intel and Nvidia's plans to co-develop custom data centre and PC chips.

What Detracted from Returns:

- Owning Intuit, a US financial software firm, was unhelpful. Its share price fell as a weaker-than-expected outlook overshadowed the company's strong fourth-quarter results. With Intuit's QuickBooks and TurboTax products already enjoying high market penetration, accelerating organic revenue growth remains challenging, as most incremental gains stem from higher-end customers replacing lower-end ones.
- Being underweight US technology company Oracle was unhelpful. The company recorded a sharp acceleration in orders, driven largely by deepening partnerships with large language model providers, underscoring the company's growing role in AI infrastructure.

Outlook

Looking forward, we expect that the markets will continue to be volatile as geopolitical events and rhetoric remain elevated. Forecasting sector and country winners will be as challenging as ever. In this uncertain macro environment, we believe that a focus on diversification and bottom-up stock selection is likely the best path to realising incremental returns.

The global investment landscape in 2025 presents both opportunities and challenges. While AI-driven productivity gains offer significant potential, investors must remain vigilant of geopolitical and economic uncertainties. A strategic focus on diversification and careful stock selection will be crucial in realising returns amidst ongoing market fluctuations.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2025.

¹ **Source:** Lazard Asset Management, NAV to NAV price, net income reinvested in US dollars, 'A' accumulation share class, net of fees, to 30 September 2025. Index returns shown on a total return basis.

Figures refer to past performance which is not a reliable indicator of future results.

Lazard Asset Management LLC
30 September 2025

Investment Managers' Report (continued)

Lazard Global Equity Franchise Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Global Equity Franchise Fund (the "Fund") returned 3.35%, net of fees and in US dollar terms, against the MSCI World Index, which returned 19.58%¹.

Market Review

Equity markets worldwide rose, as abating tariff risk and expectations of a favourable shift in the global monetary landscape bolstered risk appetites. The US Federal Reserve (Fed) cut interest rates by 25 basis points in September citing rising downside risks to employment after being on hold for months as it balanced a weakening US labour market against persistent inflation. The Fed signalled two additional rate cuts this year but, noting the 'challenging situation' it faces, warned that policy could shift quickly. Meanwhile, the European Central Bank kept rates unchanged at its September meeting, pointing to an improving outlook for economic growth and inflation in the eurozone.

Portfolio Review

What Contributed to Returns:

- US-listed Brightstar Lottery sold its gaming operations for US\$4 billion, leaving it as a pure-play lottery concessions business. It also announced a US\$1.1 billion share buyback and a special dividend.
- Luxembourg-based SES, a satellite communication service provider, achieved key operational milestones and advanced growth in satellite broadband and data services.
- UK-based water company United Utilities posted strong full-year results. Its investor day reinforced confidence in its readiness for the 2025–2030 investment step-up.

What Detracted from Returns:

- Owning Fiserv, a US-based financial technology and payments company, was unhelpful. Its share price dropped to a 14-year low amid concerns over the launch of its new product, Clover.
- Owning Edenred, a French-based international payment service provider, was unhelpful. Its share price dipped on potential French tax changes to employer benefits.
- Owning Baxter International, a US healthcare company focused on products to treat chronic and acute medical conditions, was unhelpful. Its share price fell on a US trade investigation that could raise tariffs.

Outlook

Overall, equity markets look increasingly expensive, with geopolitical and macroeconomic risks still present. We anticipate that volatility will remain elevated, making cautious, value-driven stock selection essential for delivering positive returns. The Global Equity Franchise portfolio holds market leaders and monopolies with more predictable long-term earnings than the broader market, alongside reasonable valuations. Given our conservative value-based approach, the portfolio remains relatively concentrated. The portfolio is currently trading at a sizable discount to intrinsic value as well as to the broader MSCI World Index on a number of valuation measures. Notwithstanding a period of difficult relative performance of late, we believe the market today offers an opportunity to buy global leaders and monopolies at a discount and our portfolio is positioned to capture any re-rating in such names.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2025.

¹ **Source:** Lazard Asset Management, NAV to NAV price, net income reinvested in US dollars, 'A' accumulation share class net of fees, to 30 September 2025.

Fund Manager: Bertrand Cliquet and team.

Figures refer to past performance which is not a reliable indicator of future results.

Lazard Asset Management Pacific Co.
30 September 2025

Investment Managers' Report (continued)

Lazard Global Small Cap Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Global Small Cap Fund (the "Fund") returned 19.04%, net of fees and in US dollar terms, against the MSCI World Small Cap Index, which returned 21.10%¹.

Market Review

Global equity markets rose over the period as concerns over tariff risk faded and expectations of a favourable shift in the global monetary landscape bolstered risk appetites among investors. After keeping US interest rates on hold for months, the Federal Reserve (the Fed) cut interest rates by 25 basis points in September. It cited rising downside risks to employment as it balanced a weakening US labour market against persistent inflation. The Fed signalled two additional rate cuts this year, but noting the 'challenging situation' it faces, warned that policy could shift quickly. Meanwhile, the European Central Bank kept eurozone interest rates unchanged at its September meeting, pointing to an improving outlook for economic growth and inflation in the region.

Portfolio Review

What Contributed to Returns:

- Shares of US-listed internet connectivity equipment provider Credo Technology rose after the company reported quarterly results that showed solid revenue growth across an increasingly diversified customer base.
- Shares of Japanese water purification supplier Organo rose amid a strong pricing environment as the company continued to be a beneficiary of demand for AI infrastructure.

What Detracted from Returns:

- Shares of US-listed home furnishings maker RH fell as investors were concerned about the impacts that tariffs would have on the company's business.
- Shares of SPS Commerce, a US cloud-based supply chain management solution provider, fell despite the company reporting solid results across its businesses, including a modest acceleration in organic customer growth. However, some investors were concerned that management's medium-term outlook implied a step down in organic growth, resulting in what we believe to be an overly negative stock reaction.

Outlook

We continue to believe small caps are well positioned to outperform as the early stages of an economic recovery and higher spending in Europe, lower inflation and interest rate regimes globally, and historic valuation discounts versus large-cap stocks across regions could all provide tailwinds. With several headwinds for the asset class subsiding, we expect markets to increasingly favour high-quality businesses with attractive valuations over the longer term and believe the portfolio is poised to outperform as a result.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2025.

¹ **Source:** Lazard Asset Management, NAV to NAV price, net income reinvested in US dollars, 'A' accumulation share class, net of fees, to 30 September 2025. Index returns shown on a total return basis.

Figures refer to past performance which is not a reliable indicator of future results.

Lazard Asset Management LLC
30 September 2025

Investment Managers' Report (continued)

Lazard Digital Health Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Digital Health Fund (the "Fund") returned 10.21%, net of fees in US dollar terms, against the MSCI World Health Care Index, which returned -1.21%, and the broader MSCI World Index, which returned 19.58%¹.

Market Review

Global equity markets delivered strong, broad-based gains, supported by resilient investor sentiment despite ongoing economic, trade, and geopolitical challenges. Initial concerns over tariffs eased as trade tensions moderated, helping sustain optimism. Central banks adjusted policies in response to inflation and growth trends, with the US Federal Reserve restarting rate cuts in September, while Europe slowed its easing cycle amid renewed inflation pressures. Corporate earnings were generally solid, particularly in North America, where consumer demand remained strong, while Europe and parts of Asia saw more mixed results.

Technology and communication sectors led performance, driven by innovation and AI momentum. The healthcare sector has underperformed the broader market due to persistent macroeconomic and geopolitical uncertainties that have weighed on investor sentiment. Policy uncertainty in healthcare has risen to levels not seen since the early COVID-19 period, putting pressure on valuations, particularly for large pharmaceutical companies. Additional challenges included discussions around significant tariffs on pharmaceuticals, potential impacts from drug pricing policies, and risks related to transfer pricing and international taxation. Their combined effect has contributed to weaker performance compared to the overall market.

Portfolio Review

What Contributed to Returns:

- Owning TransMedics, a US-based organ transplant technology company, added value. The company reported better-than-expected first-quarter results, highlighted by a 48% increase in sales from a year earlier.
- Owning Ionis Pharmaceuticals, a US-based RNA-targeted drug developer, was helpful. Ionis published encouraging Phase 3 clinical trial data for its drug Olezarsen in patients suffering from severe hypertriglyceridemia (sHTG), which may open up a large addressable market for this drug.

What Detracted from Returns:

- Owning Lantheus, a US-based radiodiagnostics company, was unhelpful. Lantheus reported disappointing second-quarter results and reduced its outlook for the full year, mainly due to pricing pressure on its key product, Pylarify, brought about when a competitor began offering steep discounts that forced Lantheus to either lower its own prices or risk losing customers.
- Owning Inspire Medical Systems, a US-based medical device maker, was unhelpful. Despite reporting a positive second-quarter earnings surprise, Inspire saw its stock price depreciate after issuing a negative full-year guidance revision for revenue and profit due to delays in a necessary software implementation required for its next-generation Inspire V system.

Outlook

Over the past three years, healthcare has lagged the market due to weak returns, policy uncertainty, slow M&A activity, and the post-pandemic downturn, shrinking to its smallest share of the S&P 500 in decades. Many challenges are now easing, with political and regulatory headwinds less severe, M&A activity improving, valuations near historic lows, and demand recovering—positioning the sector for a potentially strong rebound. AI brings scope for significant opportunities, from advanced diagnostics and personalised treatments to streamlined operations that free healthcare professionals to focus on patient care. These innovations can save time, reduce costs, and unlock major revenue streams, potentially setting up healthcare for renewed strength.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 30 September 2025.

¹ **Source:** Lazard Asset Management, NAV to NAV Price, Net Income Reinvested in US dollars, 'A' accumulation share class, net of fees, to 30 September 2025. Index returns shown on a total return basis.

Lazard Asset Management LLC
30 September 2025

Investment Managers' Report (continued)

Lazard Baylight US Large Cap Fund*

Investment Review

Since its launch on 7 July 2025 to 30 September 2025, the Lazard Baylight US Large Cap Fund (the "Fund") returned 9.23%, net of fees and in US dollar terms, against the S&P 500 Index, which returned 7.57%¹.

Market Overview

The US equity market rose sharply, as an improving outlook for interest rates bolstered risk appetites amid heightened domestic economic uncertainty.

US stocks continued to rally after the steep market sell-off when the US rolled out its new trade policy. Optimism that the US might moderate its push for higher tariffs was reinforced by trade deals with Japan and the European Union, as well as an agreement with China to extend their trade truce to 10 November. Notably, the US's announcement in early August that it was introducing new import taxes—with some rates as high as 50%—on roughly 90 countries after its trade-deal deadline had passed received a muted response from the US stock market.

While investor concerns over US trade policy eased, the issue remained front and centre for policymakers at the US Federal Reserve (Fed). The Fed—which over the past several months had been seeking to strike a balance between the competing pressures of a weakening US labour market and persistent inflationary pressure stemming from US tariffs—lowered interest rates by 25 basis points at its policy meeting in September.

Portfolio Review

Contributors

- Underweight exposure to consumer staples and overweight exposure to information technology was beneficial to relative performance.
- Stock selection within the industrials and health care sectors helped relative performance.
- Lam Research, a semiconductor equipment manufacturer, was one of the largest individual contributors for the period. Record results, a robust product pipeline, and optimism around future industry upgrade spending drove shares higher.

Detractors

- Overweight exposure to the health care sector detracted from relative performance.
- Stock selection in the consumer discretionary and materials sectors hurt relative performance.
- Adobe, a software leader in creative industries, was a detractor for the month. Strong results and raised full-year guidance were overshadowed by concerns over slowing growth in key segments and rising competitive pressures.

Outlook

The US large-cap equity market continues to demonstrate resilience amid a dynamic economic climate. Supported by stable corporate earnings, robust balance sheets, and ongoing innovation, many leading companies are well positioned for growth. While some volatility may persist due to shifting monetary policy and global factors, long-term fundamentals remain constructive. Strong consumer demand and adaptive business models provide a solid foundation for future performance. Selectivity and discipline will be important as valuations have adjusted, but the overall environment offers opportunities for investors focused on quality and sustainable growth. We remain optimistic about the prospects for US large-cap equities.

Lazard US Equity Concentrated Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard US Equity Concentrated Fund (the "Fund") returned 13.20%, net of fees and in US dollar terms, against the S&P 500 index, which returned 19.72%¹.

Market Review

US equity markets rose sharply over the period as concerns over tariff risk faded and expectations of a favourable shift in the monetary landscape bolstered risk appetites among investors.

Optimism that the US would moderate its push for higher tariffs found support after the country announced trade deals with Japan and the European Union and from news that the US and China had agreed to extend their trade truce to early November. Notably, an August announcement from the US that it was introducing new import taxes on roughly 90 countries received a muted response from the US stock market, suggesting that investors have grown inured to the ebb and flow of US trade-policy developments.

After keeping US interest rates on hold for months, the Federal Reserve (the Fed) cut interest rates by 25 basis points in September. It cited rising downside risks to employment as it balanced a weakening US labour market against persistent inflation. The Fed signalled two additional rate cuts this year, but noting the 'challenging situation' it faces, warned that policy could shift quickly.

Portfolio Review

What Contributed to Returns:

- Owning Coherent, a global leader in lasers and semiconductors, particularly optical transceivers (small components that reliably connect switches and servers in a data centre), was helpful. Its share price rose as AI hyperscalers gave an encouraging outlook for AI capex spending, which investors believed would benefit Coherent's business.
- Owning DigitalOcean, a cloud computing platform for small and medium-sized businesses, was helpful. Its share price rose after management raised guidance for the year, citing confidence in revenue growth from customer activity and AI demand.

What Detracted from Returns:

- Owning Corpay, a global payments company specialising in corporate vehicle and travel expenses, was unhelpful. Its share price fell after management gave lower-than-expected organic growth guidance for the year amid macro-related weakness in its Lodging business.
- Owning Vaxcyte, a leader in novel vaccine chemistry, detracted. Disappointing data on several of its trials coupled with uncertainty around federal funding and regulation of the vaccine industry caused its shares to underperform.

Outlook

While the market has shown signs of broadening, the dominance of a small number of the largest AI-exposed companies remains a key driver. We expect the environment to ultimately normalise. Whether it is driven by lower interest rates, investor recognition that AI will likely benefit more than a handful of companies, or the fact that many quality companies with strong outlooks have been overlooked by the AI fervour, we believe a shift away from an extremely concentrated market towards one in which quality reasserts itself is inevitable.

Lazard US Small Cap Equity Fund

Investment Overview

Over the six-month period ending 30 September 2025, the US Small Cap Equity Fund (the "Fund") returned 14.75%, net of fees in US dollar terms, against a return of 21.93% for the Russell 2000 Index¹.

Market Overview

The US small-cap equity market rose sharply in the six months to the end of September 2025, as an improving outlook for interest rates bolstered risk appetites amid heightened domestic economic uncertainty.

US small-cap stocks continued to rally after the steep market sell-off in early April when the US rolled out its new trade policy. Optimism that the US might moderate its push for higher tariffs was reinforced by trade deals with Japan and the European Union, as well as an agreement with China to extend their trade truce to 10 November.

The US Federal Reserve, which over the past several months had been seeking to strike a balance between the competing pressures of a weakening US labour market and persistent inflationary pressure stemming from US tariffs, lowered interest rates by 25 basis points at its policy meeting in September. The US central bank also forecast two more rate cuts this year, but warned that it may change course quickly.

Portfolio Review

Underperformance relative to the Russell 2000 Index primarily reflects the continued strength of speculative investment in certain market segments. We have seen periods like this before, and these phases are often short-lived and then followed by strong outperformance of high-quality companies. Today our portfolio is less than one-third the P/E of the Russell 2000, yet 3.5 times the return on equity. This positioning indicates we may be in an environment that does not require a tradeoff between price and quality.

Contributors

- Stock selection in the consumer discretionary sector boosted relative performance.
- Underweight exposure to the financials sector was beneficial to relative performance.
- Underweight exposure to the energy and utilities sectors was beneficial to relative performance.

Detractors

- Stock selection in the information technology sector detracted from relative performance.
- Stock selection in the industrials sector hurt relative performance.
- Overweight to the consumer staples sector undercut relative performance.

Outlook

Looking ahead, we continue to believe that there are multiple tailwinds for US small-cap stocks:

- Valuation discount: Small-caps trade near historic lows relative to large-caps, while large-caps remain at a premium to their historical average.
- Earnings growth potential: Small-caps earnings growth flipped to positive double digits after a period of depressed earnings growth.
- Macro and regulatory shifts: Potential additional rate cuts, easing regulatory burdens, and a focus on domestic production could disproportionately benefit small caps.

In our view, speculative investment in certain companies may continue to lead to outperformance in the near term, but history shows that fundamentals and valuation ultimately prevail. Our disciplined and adaptive process, which focuses on fundamentals and attractive valuations, has historically been successful over full market cycles and we are optimistic about the future.

Lazard Japanese Strategic Equity Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Japanese Strategic Equity Fund (the "Fund") returned 15.60%, net of fees and in yen terms, against the TOPIX Total Return Index, which returned 19.22%¹.

Market Review

In Q2 2025, Japanese equities gained despite yen strength and domestic uncertainty. Early volatility followed US tariff hikes on Chinese goods and reciprocal measures from China. A 90day pause and a US–China trade truce in May lifted sentiment, though no US–Japan deal was reached by quarterend. The Bank of Japan (BoJ) held rates steady, cut growth and inflation forecasts, and stayed cautious despite above-target inflation releases. The yen rose against the US dollar and Japanese government bond yields fell, while the TOPIX Index advanced.

In Q3, equities rallied on easing trade tensions and an improved US rate outlook. Global markets rebounded after April's selloff, aided by trade agreements between the US and Japan, and the US and the EU, plus an extended US–China truce. The US Federal Reserve (Fed) cut rates by 25 basis points in September but maintained a cautious tone. The BoJ kept rates unchanged but raised inflation forecasts, prompting speculation of hikes. The yen fell and Japanese government bond yields rose. Political uncertainty followed Prime Minister Shigeru Ishiba's resignation in September. The July US–Japan trade deal reduced some tariffs but kept them above pretradewar levels. Corporate earnings were mixed.

Portfolio Review

What Contributed to Returns:

- Owning Shimizu Corporation, a leading general contractor, aided performance. Its share price rose after it reported better-than-expected earnings, driven by improving architectural margins.
- Owning TDK Corporation, a leading electronic component manufacturer, was helpful. It outperformed following a favourable launch for Apple's new iPhone, for which it provides batteries.
- Owning Inpex Corporation, Japan's leading energy exploration and production company, was helpful. Its share price rose following an unexpected dividend increase and a strategy update.

What Detracted from Returns:

- Owning Yakult Honsha Co, a leading pro-biotic drink manufacturer, was unhelpful. Its share declined after reporting disappointing quarterly earnings due to weaker-than-expected domestic demand.
- Owning Seven & I Holdings Co., Ltd., the world's largest convenience store operator, was unhelpful. It underperformed after Canadian convenience store operator Couche-Tard withdrew its takeover offer.
- Owning Nitori Holdings Co., Japan's leading furniture retailer, was unhelpful. It underperformed after reporting sluggish same-store sales.

Outlook

Market momentum remained strong despite political headwinds due to Prime Minister Ishiba's resignation. While the Liberal Democratic Party presidential contest could impact the market in the short term, we do not expect a material change in policy direction by the government. We believe that, in the near term, the market will focus on earnings outlooks given at the half-way mark of the fiscal year in October/November. While short-term momentum may slow due to the secondary effects of US tariffs, underlying inflation expectations remain intact, and progress in corporate governance continues on track. Our baseline outlook for strong medium- and long-term corporate earnings growth remains.

Lazard Emerging Markets Equity Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Emerging Markets Equity Fund (the "Fund") returned 21.46%, net of fees and in US dollar terms, against the MSCI Emerging Markets Index, which returned 23.91%¹.

Market Review

Equity markets in the developing world, as measured by the MSCI Emerging Markets Index, surged and outperformed their counterparts in the developed world.

Latin America eclipsed the broader index appreciating 27.0%. Brazil's stock market recorded a solid gain, as the rhetoric between the leaders of Brazil and the US cooled. Stock markets in Chile, Peru and Colombia climbed on optimism over commodity prices amid rising inflation potential. Mexico's stock market rose sharply. Risk appetites were bolstered by ongoing tariff negotiations between Mexico and the US and news that the country's central bank had cut interest rates to a three-year low with a 25-basis points reduction in September.

Emerging Asia slightly outperformed the broader index. China's stock market rose sharply, as investors gained renewed confidence in the country's corporate sector despite muted economic growth. Stock markets in the global technology hubs South Korea and Taiwan surged on ongoing enthusiasm for AI. India's stock market was virtually flat, hurt by concerns that the US's proposal for stricter visa requirements will adversely impact India's US\$283 billion information technology sector, which gets more than half its revenue from the US. India's stock market was weighed down further by concerns about how the US's 50% tariff on Indian goods might impact the country's economy.

Within emerging Europe, the Middle East and Africa, Greece's stock market rose on positive sentiment about the significant increase in corporate profitability. South Africa's stock market was boosted by the surge in the gold price. Egypt's stock market rose due to the country's improving economic outlook.

Portfolio Review

What Contributed to Returns:

- From a country perspective, being materially underweight India and overweight Mexico, as well security selection within Mexican stocks.
- From a sector perspective, stock selection in financials, healthcare and consumer discretionary and being underweight consumer discretionary.
- Owning Wiwynn a Taiwanese company specialising in the design, manufacturing and delivery of cloud infrastructure products. Its share price surged after reporting strong first quarter results with net profit more than doubling year-over-year.

What Detracted from Returns:

- From a country perspective, stock selection in South Africa, China and Brazil and being underweight Taiwan.
- From a sector perspective, being underweight information technology and stock selection within the sector.
- Being underweight Taiwan Semiconductor Manufacturing Company and not owning Samsung Electronics.

Outlook

Most market participants appear to be patiently watching to see what trade measures are determined on a worldwide basis. As visibility becomes clearer, our belief is that investment variables will materialise, and decisions will begin to be taken. Our expectations will vary based upon these issues, but, at this juncture, given valuations and fundamentals, we are reasonably constructive on emerging markets as long as global growth remains balanced.

Lazard Emerging Markets Equity Advantage Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Emerging Markets Equity Advantage Fund (the "Fund") returned 24.45%, net of fees and in US dollar terms, against the MSCI Emerging Markets Index, which returned 23.91%¹.

Market Review

Equity markets in the developing world surged and outperformed their counterparts in the developed world.

Latin America eclipsed the broader index. Brazil's stock market recorded a solid gain, as the rhetoric between the leaders of Brazil and the US cooled. Stock markets in Chile, Peru and Colombia climbed on optimism over commodity prices amid rising inflation potential. Mexico's stock market rose sharply. Risk appetites were bolstered by ongoing tariff negotiations between Mexico and the US and Mexican interest rates being cut to a three-year low.

Emerging Asia slightly outperformed the broader index. China's stock market rose sharply, as investors gained renewed confidence in the country's corporate sector despite muted economic growth. Stock markets in the global technology hubs South Korea and Taiwan surged on ongoing enthusiasm for AI. India's stock market was virtually flat, hurt by concerns that the US's proposal for stricter visa requirements and concerns about how the US's 50% tariff on Indian goods might impact the country's economy.

Alpha measures were generally positive during the second calendar quarter. Quality measures provided the largest contribution as investors assumed a risk-off position for the quarter. Sentiment was also favourable for the period despite a reversal in May. Risk measures were a dominant theme during the third calendar quarter as higher beta and more volatile stocks led. Sentiment measures provided value throughout the quarter. By contrast, value measures proved ineffective. Quality measures, particularly traditional measures such as return on equity, lagged across the emerging markets, particularly in Asian markets outside China.

Portfolio Review

What Contributed to Returns:

- Stock selection and sector allocation benefited the portfolio, the latter helped by the underweight position in energy and overweight position in information technology.
- Stock selection was favourable in South Korea and Taiwan.
- Sentiment and growth measures worked well throughout the period.

What Detracted from Returns:

- Holding operating cash detracted from relative returns.
- Value measures were unhelpful over the period.
- Being underweight the materials and communication services sectors hurt performance as did stock selection in Mexico and China.

Outlook

Looking forward, we expect that the markets will continue to be volatile as geopolitical events and rhetoric remain elevated. Forecasting sector and country winners will be as challenging as ever. In this uncertain macro environment, we believe that a focus on diversification and bottom-up stock selection is likely the best path to realising incremental returns.

The global investment landscape in 2025 presents both opportunities and challenges. While AI-driven productivity gains offer significant potential, investors must remain vigilant of geopolitical and economic uncertainties. A strategic focus on diversification and careful stock selection will be crucial in realising returns amidst ongoing market fluctuations.

Lazard Emerging Markets Managed Volatility Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Emerging Markets Managed Volatility Fund (the "Fund") returned 16.31%, net of fees and in US dollar terms, against the MSCI Emerging Markets Index, which returned 23.91%¹.

Market Review

Equity markets in the developing world surged and outperformed their counterparts in the developed world.

Latin America eclipsed the broader index. Brazil's stock market recorded a solid gain, as the rhetoric between the leaders of Brazil and the US cooled. Stock markets in Chile, Peru and Colombia climbed on optimism over commodity prices amid rising inflation potential. Mexico's stock market rose sharply. Risk appetites were bolstered by ongoing tariff negotiations between Mexico and the US and Mexican interest rates being cut to a three-year low.

Emerging Asia slightly outperformed the broader index. China's stock market rose sharply, as investors gained renewed confidence in the country's corporate sector despite muted economic growth. Stock markets in the global technology hubs South Korea and Taiwan surged on ongoing enthusiasm for AI. India's stock market was virtually flat, hurt by concerns that the US's proposal for stricter visa requirements and concerns about how the US's 50% tariff on Indian goods might impact the country's economy.

Alpha measures were generally positive during the second calendar quarter. Quality measures provided the largest contribution as investors assumed a risk-off position for the quarter. Sentiment was also favourable for the period despite a reversal in May. Risk measures were a dominant theme during the third calendar quarter as higher beta and more volatile stocks led. Sentiment measures provided value throughout the quarter. By contrast, value measures proved ineffective. Quality measures, particularly traditional measures such as return on equity, lagged across the emerging markets, particularly in Asian markets outside China.

Portfolio Review

What Contributed to Returns:

- Stock selection in the financials and real estate sectors helped returns.
- Being underweight in energy and financials aided relative performance.

What Detracted from Returns:

- Consistent with the low volatility character of the Fund, the portfolio's underweight position in information technology and overweight position in consumer staples were the largest detractors from relative returns.
- Stock selection and holding operating cash were both unhelpful.

Outlook

Looking forward, we expect that the markets will continue to be volatile as geopolitical events and rhetoric remain elevated. Forecasting sector and country winners will be as challenging as ever. In this uncertain macro environment, we believe that a focus on diversification and bottom-up stock selection is likely the best path to realising incremental returns.

The global investment landscape in 2025 presents both opportunities and challenges. Investment Managers' Report (continued)

Lazard Global Bond Fund*

Investment Review

Since its launch on 15 May 2025 to 30 September 2025, the Lazard Global Bond Fund (the "Fund") returned 3.22%, net of fees and in US dollar terms, against the Bloomberg Global Aggregate Bond Index, which returned 2.68%¹.

Market Review

Over the reporting period, evolving US fiscal and trade policies, alongside central bank actions, drove significant shifts in global fixed income markets. The US continued to reinforce its growth prospects with supportive tax legislation and new trade agreements, though persistent fiscal deficits and unresolved tariffs with China remain risks. Inflation stayed contained overall, despite concerns about tariff-driven price pressures, while labour market softness and upward revisions to economic forecasts fed debate within the Federal Reserve—culminating in a rate cut in September that raised questions about future policy direction. US Treasury yields fluctuated but ended the period lower, while European and Japanese government bonds experienced modest upward pressure and country-specific credit events, such as France's downgrade and Spain's upgrade, added nuance to the regional outlook. Corporate credit spreads compressed to multi-year lows, as resilient risk appetite drove strong demand in both investment-grade and high-yield sectors. Amid ongoing geopolitical tensions and idiosyncratic moves in emerging markets (EM), hard currency EM debt continued to perform robustly. With global monetary policy becoming increasingly divergent, our positioning remains focused on active management across rates, credit, and currency exposures to capture opportunities and manage risks in this dynamic environment.

Portfolio Review

What Contributed to Returns:

- Duration: underweight interest rate sensitivity to euro-denominated and Chinese renminbi-denominated bonds.
- Carry: overweight positions to Turkish lira, Brazilian real, Norwegian krona and New Zealand dollar-denominated bonds.
- Security selection on the euro-denominated bond curve.

What Detracted from Returns:

- Duration: underweight interest rate sensitivity to US dollar-denominated bonds.
- Security selection on the US dollar-denominated bond curve.
- Currency management: overweight exposure to the Turkish lira.

Outlook

US economic data shows renewed momentum, with inflation risks appearing contained but gradual price adjustments potentially proving more persistent than previously expected. While rate cuts remain likely, a pause later this year is possible. We continue to believe US 10-year Treasury yields, which peaked in May, should stabilise within the 4.00%–4.40% range, with higher yields offering attractive value. Globally, curve steepening provides opportunities in markets like New Zealand, the UK, Australia, Singapore and Norway. Riskier corporate bonds are trading at tight levels, but all-in yields remain attractive though further spread compression potential seems limited. The US dollar is likely to stabilise after recent weakness, and emerging market volatility continues to present opportunities for active management. Overweights on the Brazilian, Thai, Romanian, and Mexican yield curves, plus currency positions in the Turkish lira and Brazilian real, remain core to our strategy.

All data contained herein is sourced by Lazard Asset Management Limited unless otherwise noted as of 30 September 2025.

Lazard Asset Management LLC
30 September 2025

Investment Managers' Report (continued)

Lazard Listed Private Markets Fund

Investment Review

Over the six-month period ending 30 September 2025, the Lazard Listed Private Markets Fund ("the Fund") returned 12.70%, net of fees and in US dollar terms, against the MSCI World Index, which returned 19.58%¹.

Market Review

Markets enjoyed strong gains during the period as confidence returned after the initial shock of the Trump administration's tariff announcements. There was notable strength in technology and artificial intelligence-related stocks. In private markets, concerns remained around the slow rate of realisations in private equity and, towards the end of the period, company-specific credit losses in the US.

Portfolio Review

What Contributed to Returns:

- By investment type, the Fund's "diversifiers" (+25.8%), private equity (+18.7%), real assets (infrastructure +18.0%, real estate +16.9%) and listed managers (+14.4%) all delivered strong returns.
- Owning precious metal royalty companies Wheaton Precious Metals and Franco Nevada was helpful, with both stocks buoyed by a sharp rise in the gold price.

What Detracted from Returns:

- Private credit (-6.5%) was a material laggard.
- In private credit, FS KKR Capital Corporation and Oaktree Specialty Lending were both impacted by credit issues on certain portfolio loans and widening discounts to net asset value.

Outlook

At the end of the period the portfolio was balanced in its allocation, reflecting the spread of attractive risk-adjusted return opportunities we see across asset classes. Allocations to listed private equity (including venture capital) and private market asset managers account for close to 60% of the portfolio. This reflects our belief that the environment for realisations is improving, while fundraising by our selected managers continues at a steady pace. The remaining 40% of the portfolio is distinct and diverse, being designed to deliver lower volatility and uncorrelated gains over time. The portfolio remains biased towards European opportunities, where valuations remain materially lower than in the US.

We continue to see significant value in the portfolio. Negative sentiment towards private markets, and particularly private credit, helps to explain the underperformance of public equities of late but is, we feel, misplaced. With an initial interest rate cut having taken place in the US, and more expected, and with many private equity assets now trading at lower valuations than public equities, we see scope for positive surprises. Concerns around credit issues have seen a rapid repricing of risk in that part of our universe, of which we may seek to take advantage. Considerable value has appeared in European listed private market managers following a prolonged period of underperformance relative to their US competition. Divergent performance across our investible universe continues to offer opportunities for active management.

* Fund fully redeemed on 26 June 2025.

** The Lazard Global Active Funds plc balances for the financial period ended 30 September 2024 have not been adjusted for the removal of Lazard Global Managed Volatility Fund, Lazard Climate Action Fund and Lazard Pan-European Small Cap Fund, which were terminated prior to 31 March 2025.

Gains and losses arose solely from continuing operations.

There were no gains or losses other than those dealt with in the Statement of Comprehensive Income.

The EUR, GBP and JPY Funds are translated in the total column at the average exchange rate for the financial period as disclosed in Note 7.

The accompanying notes are an integral part of the financial statements.

Notes to the Financial Statements

1. General

Lazard Global Active Funds plc (the “Company”) was incorporated on 10 April 1996 as an open-ended investment company with variable capital structured as an umbrella fund and with segregated liability between its sub funds (individually referred to as the “Fund” and collectively the “Funds”) organised under the laws of Ireland. The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the “Central Bank”) as an Undertaking for Collective Investment in Transferable Securities under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and the Central Bank’s (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2019 (as amended), (the “Central Bank UCITS Regulations”). The Company is structured as an umbrella fund in that the share capital of the Company may be divided into different classes of Shares with one or more classes representing a separate Fund of the Company.

The Company currently has 31 Funds in existence, 16 of which are active as at 30 September 2025. As at 30 September 2025, Lazard Global Listed Infrastructure Equity Fund, Lazard Global Sustainable Equity Fund, Lazard Global Thematic Focus Fund, Lazard Global Equity Advantage Fund, Lazard Global Equity Franchise Fund, Lazard Global Small Cap Fund, Lazard Digital Health Fund, Lazard Baylight US Large Cap Fund (launched on 7 July 2025), Lazard US Equity Concentrated Fund, Lazard US Small Cap Equity Fund, Lazard Japanese Strategic Equity Fund, Lazard Emerging Markets Equity Fund, Lazard Emerging Markets Equity Advantage Fund, Lazard Emerging Markets Managed Volatility Fund, Lazard Global Bond Fund (launched on 15 May 2025) and Lazard Listed Private Markets Fund were funded. The investment objectives of each Fund within the Company are set out in the Prospectus and relevant Supplements for the Funds.

Lazard Global Equity Income Fund was fully redeemed on 19 February 2019 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Sterling High Quality Bond Fund was fully redeemed on 14 October 2019 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Pan European Equity Fund and Lazard UK Omega Equity Fund were fully redeemed on 25 November 2019 and are pending application to the Central Bank to revoke the Funds’ authorisation.

Lazard MENA Fund was fully redeemed on 28 May 2020 and continues to hold two untradeable holdings, NMC Health Plc and National Gulf Ltd. These positions are considered worthless.

Lazard Global Strategic Equity Fund was fully redeemed on 27 July 2021 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Emerging Markets Core Equity Fund was fully redeemed on 30 June 2022 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Emerging World Fund was fully redeemed on 17 January 2023 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Developing Markets Equity Fund was fully redeemed on 31 July 2023 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Global Thematic Fund was fully redeemed on 29 January 2024 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Pan-European Small Cap Fund was fully redeemed on 13 June 2024 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Global Managed Volatility Fund was fully redeemed on 17 July 2024 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Climate Action Fund was fully redeemed on 20 February 2025 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard Global Sustainable Fixed Income Fund was fully redeemed on 26 June 2025 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Lazard European Equity Fund was fully redeemed on 30 September 2025 and is pending application to the Central Bank to revoke the Fund’s authorisation.

Notes to the Financial Statements (continued)

2. Accounting Policies

The accounting policies and estimation techniques adopted by the Company in the preparation of these condensed interim unaudited financial statements are set out below. All references to net assets throughout the financial statements refer to Net Assets Attributable to Redeemable Participating Shareholders unless otherwise stated.

Statement of Compliance

The condensed interim unaudited financial statements for the financial period ended 30 September 2025 have been prepared in accordance with Financial Reporting Standard ("FRS") 104: "Interim Financial Reporting" and the UCITS Regulations.

The condensed interim unaudited financial statements should be read in conjunction with the audited financial statements for the financial year ended 31 March 2025, which have been prepared in accordance with FRS 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102"), Irish statute comprising the Companies Act 2014 and the UCITS Regulations.

The same accounting policies, presentation, estimates, judgments and methods of computation have been followed in this unaudited interim report and financial statements as were applied in the preparation of the Company's annual audited financial statements for the financial year ended 31 March 2025.

This interim report and financial statements are unaudited. We note that the statutory auditor's report in the Company's annual audited financial statements for the financial year ended 31 March 2025 was unqualified.

Basis of Preparation

These condensed unaudited financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The Company's management has made an assessment of the Company's and Funds' ability to continue as a going concern and is satisfied that the Company and Funds have the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements of the Company and Funds (with the exception of the fully redeemed Funds noted below) continue to be prepared on a going concern basis.

Lazard European Equity Fund and Lazard Global Sustainable Fixed Income Fund were fully redeemed during the financial period ended 30 September 2025. As a result, the financial statements of these Funds have been prepared on a non-going concern basis.

The Company has availed of the exemption available to open-ended investment funds under FRS 102, Section 7 "Statement of Cash Flows" not to prepare a cash flow statement on the basis that substantially all of the Company's investments are highly liquid and carried at fair value, and the Company provides a Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.

Foreign Exchange Translation

Functional and presentation currency: Items included in the Company's financial statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). This is US Dollar ("USD") except for Lazard Japanese Strategic Equity Fund which is Japanese Yen ("JPY"), Lazard European Equity Fund which is Euro ("EUR") and Lazard Global Listed Infrastructure Equity Fund which is British Pound ("GBP"). The Company has adopted the functional currency of each Fund as the presentation currency for each Fund, and the Company level financial statements are presented in USD, which is the Company's presentation currency.

For the purpose of combining the financial statements of each Fund presented in EUR, GBP and JPY to arrive at the aggregated figures, the current financial assets and current financial liabilities in the Statement of Financial Position have been translated to USD at the exchange rate at the respective financial period/year end dates. The amounts in the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders have been translated to USD using an average rate for the financial period as an approximation for actual rates. This has no effect on the Net Asset Value ("NAV") per Share attributable to the individual Funds. All exchange rates are disclosed in Note 7.

The foreign currency translation adjustment of USD 73,358,492 (30 September 2024: USD 123,416,188) included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders reflects the movement in exchange rates for the financial period. This is a notional amount which has no impact on the results of the individual Funds.

Notes to the Financial Statements (continued)

3. Fees

Management Fees

The Manager has responsibility for the management and administration of the Company's affairs and the distribution of the Shares, subject to the overall supervision and control of the Directors.

The Manager is entitled to a charge per annum of the NAV attributable respectively to each of the following share classes.

Such fees as detailed below shall accrue daily and be payable monthly in arrears. The Manager shall also be entitled to be reimbursed by the Funds for its reasonable out-of-pocket expenses.

Notes to the Financial Statements (continued)

3. Fees (continued)

Management Fees (continued)

* Fund launched on 15 May 2025.

** Fund fully redeemed on 26 June 2025.

*** Fund launched on 7 July 2025.

**** Fund fully redeemed on 30 September 2025.

See Note 15 for information on the launch and termination dates of the above share classes.

Investors are only permitted to hold units in the X share class where Lazard or an affiliate are appointed as the investment managers to carry out investment management or advisory services on their behalf. Shareholders in the class will be subject to a fee with regard to their investment in the Funds based on the Investment Management Agreement between themselves and the Investment Managers or a Lazard affiliate. Shares in the M Classes are available only to other Funds managed or advised by an affiliate or to such other persons as the Manager may determine from time to time. The annual management fees on the M Class and X Class are Nil and these classes have, therefore, been excluded in the preceding fee rate disclosure.

The Manager has delegated the performance of the investment management function in respect of the Funds to the Investment Managers. The Manager is responsible for discharging the fees and expenses of the Investment Managers, the Promoter and the Distributors out of its fee. For the financial period ended 30 September 2025, management fees of USD 24,878,532 (30 September 2024: USD 17,303,934) were charged, of which USD 4,435,792 (31 March 2025: USD 3,702,361) remained payable at the financial period/year end.

Reimbursement from Manager

Each class of Shares of each Fund shall bear its attributable portion of the other expenses of the Company, (as set out in detail under the heading “Other Expenses” in the section of the Prospectus entitled “Fees and Expenses”), which is subject to an appropriate cap per annum of the NAV of the Fund. The cap for each Fund is disclosed in the table below:

Fund Name	Cap %
Lazard Global Listed Infrastructure Equity Fund	0.30
Lazard Global Sustainable Equity Fund	0.30
Lazard Global Thematic Focus Fund	0.30
Lazard Global Equity Advantage Fund	0.23
Lazard Global Equity Franchise Fund	0.20
Lazard Global Small Cap Fund	0.38
Lazard Digital Health Fund	0.30
Lazard European Equity Fund****	0.30
Lazard Baylight US Large Cap Fund***	0.30
Lazard US Equity Concentrated Fund	0.30
Lazard US Small Cap Equity Fund	0.30
Lazard Japanese Strategic Equity Fund	0.30
Lazard Emerging Markets Equity Fund	0.30
Lazard Emerging Markets Equity Advantage Fund	0.23
Lazard Emerging Markets Managed Volatility Fund	0.30
Lazard Global Bond Fund*	0.30
Lazard Global Sustainable Fixed Income Fund**	0.30
Lazard Listed Private Markets Fund	0.30

* Fund launched on 15 May 2025.

** Fund fully redeemed on 26 June 2025.

*** Fund launched on 7 July 2025.

**** Fund fully redeemed on 30 September 2025.

As at 30 September 2025, the above caps on expenses were in effect on Lazard Global Equity Advantage Fund, Lazard Digital Health Fund, Lazard European Equity Fund, Lazard Baylight US Large Cap Fund, Lazard US Small Cap Equity Fund, Lazard Global Bond Fund, Lazard Global Sustainable Fixed Income Fund and Lazard Listed Private Markets Fund. As at 31 March 2025, the above caps on expenses were in effect on Lazard Global Equity Advantage Fund, Lazard Climate Action Fund, Lazard Digital Health Fund, Lazard Pan-European Small Cap Fund, Lazard US Small Cap Equity Fund and Lazard Listed Private Markets Fund.

Notes to the Financial Statements (continued)

3. Fees (continued)

Reimbursement from Manager (continued)

The Manager will be responsible for any such expenses in excess of this limit with the exception of the expenses of acquiring and disposing of investments (including brokerage expenses, custodial and sub-custodial transaction charges, stamp duties and other relevant taxes). For Lazard Global Equity Franchise Fund, Lazard Global Small Cap Fund and Lazard US Equity Concentrated Fund, custodial and sub-custodial transactions charges are included in the cap. For the avoidance of doubt, the Manager will not be responsible for the costs of hedging the currency exposure for the benefit of any particular share class of the Funds, which costs shall be attributable exclusively to the relevant share class.

For the financial period ended 30 September 2025, reimbursement from the Manager was USD 106,272 (30 September 2024: USD 63,374) of which USD 239,466 (31 March 2025: USD 274,638) remained receivable at the financial period/year end.

Administration, Transfer Agency and Depositary Fees

State Street Fund Services (Ireland) Limited, (the “Administrator”), is entitled to an annual fee payable by the Funds of up to 0.02% of the Funds’ NAV. Such fees accrue daily and are payable monthly in arrears. The Administrator is also entitled to recover from the Funds its reasonable out-of-pocket expenses.

State Street Custodial Services (Ireland) Limited, (the “Depositary”), is entitled to be paid by the Funds an annual fee for the performance of its trustee functions of up to 0.0075% of the Funds’ NAV. The Depositary is also entitled to charge the Funds transaction fees, which shall be at normal commercial rates, and to be reimbursed by the Funds for the fees and transactions charges of any sub-custodian (which shall also be at normal commercial rates), together with its reasonable out-of-pocket expenses. The Depositary is also entitled to be paid by the Funds at an annual fee for the performance of its function as custodian of up to 0.015% of the Fund’s NAV. Such fees accrue daily and are payable monthly in arrears.

The administration, transfer agency and depositary fees charged during the financial period ended 30 September 2025 (including out-of-pocket expenses) amounted to USD 1,529,417 (30 September 2024: USD 1,210,664), of which USD 1,303,406 (31 March 2025: USD 676,526) remained payable at the financial period/year end.

Currency Manager’s Fees

The Funds shall pay State Street Bank International GmbH (the “Currency Manager”) an annual fee, calculated and accrued daily and payable quarterly in arrears, not in excess of 0.03% per annum of the NAV of each hedged share class in issue in the relevant Funds, such fee to accrue solely to the hedged share class in respect of which it is incurred. For the financial period ended 30 September 2025, Currency Manager’s fees of USD 112,189 (30 September 2024: USD 86,184) were charged of which USD 62,298 (31 March 2025: USD 43,867) remained payable at the financial period/year end.

Directors’ Fees

Directors’ fees charged during the financial period ended 30 September 2025 amounted to USD 39,352 (30 September 2024: USD 37,266), of which USD Nil (31 March 2025: USD Nil) remained payable at the financial period/year end.

4. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 (“the TCA”), as amended. On that basis the Company will not be liable to taxation in respect of its income and gains, other than on the occurrence of a chargeable event. Generally, a chargeable event arises on any encashment, distribution, redemption, repurchase, cancellation, transfer of Shares or on the ending of a ‘relevant period’, a ‘relevant period’ being an eight-year period beginning with the acquisition of the Shares by the Shareholders and each subsequent period of eight years beginning immediately after the preceding relevant period.

A chargeable event does not include:

- a) any transactions in relation to Shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- b) an exchange of Shares representing a Fund for another Fund; or
- c) an exchange of Shares arising on a qualifying amalgamation or reconstruction of a Fund with another Fund; or
- d) certain exchanges of Shares between spouses and former spouses.

Notes to the Financial Statements (continued)

4. Taxation (continued)

A chargeable event will not occur in respect of a Shareholder who is an Exempt Irish Investor (as defined in Section 739D of the TCA) or in respect of Shareholders who are neither resident or ordinarily resident in Ireland and who have provided the Company with a relevant declaration to that effect, in accordance with Schedule 2B of the TCA.

In the absence of an appropriate declaration, and where the Company has not been authorised by Irish Revenue to make gross payments in the absence of appropriate declarations, the Company will be liable to Irish Tax on the occurrence of a chargeable event. There were no chargeable events during the financial period or prior financial period under review.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by a Fund or its Shareholders. Such non-recoverable withholding taxes are disclosed separately in the Statement of Comprehensive Income.

Pillar II Disclosure

The Organisation for Economic Co-operation and Development (OECD) released the Pillar Two model rules (the Global Anti-Base Erosion Proposal, or 'GloBE') to reform international corporate taxation. The Pillar Two legislation was enacted in Ireland and is effective for the financial year beginning 1 April 2024. The Company has assessed the impact of the OECD Pillar II GloBE rules and concluded that the Funds meet the criteria for the Investment Fund exemption under Pillar II and are out of scope for the financial period ended 30 September 2025 and the financial year ended 31 March 2025.

Withholding Tax Refunds

During the financial period ended 30 September 2025 and financial period ended 30 September 2024, a number of Funds received withholding tax refunds which were not previously recognised due to uncertainty around their recoverability. Upon receipt of these refunds, these amounts are included in the NAV of the Funds and are recorded in the Statement of Financial Position. These refunds would generally have a positive impact on the performance of the relevant Funds which received them.

5. Capital and Reserves

The Company has a variable share capital.

Management Shares

On incorporation, the authorised share capital of the Company was GBP 40,000 divided in 40,000 Subscriber Shares of par value of GBP 1 each ("Equity shares"), which were subsequently redeemed. There is currently 1 Subscriber Share in issue and that is held by the Manager.

The Subscriber Share does not form part of the NAV of the Company.

Redeemable Participating Shares

The Company also has an authorised share capital of 500,000,000,000 Shares of no par value which are available for issue as fully paid Participating Shares in each of the Company's Funds ("Redeemable Participating Shares"). They may be redeemed by the Company at the request of the Shareholder. The value of Shares issued and redeemed during the financial period is set out in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. Each Fund issues Redeemable Participating Shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable Participating Shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's NAV. The Redeemable Participating Share is carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the Share back to the Fund.

Swing Pricing

Certain costs are customarily incurred when a Fund has to buy or sell portfolio assets in order to satisfy or give effect to requests for subscription or redemption of its Shares. The incurring of such dealing costs by a Fund can result in a Fund's value being diminished or 'diluted' over time and can, therefore, have a disadvantageous effect on Shareholders' interests in a Fund if counteracting steps are not taken. With a view to offsetting the effects of dilution to the extent deemed appropriate in the interests of Shareholders, the Directors may determine at their discretion, to adjust ("Swing") the NAV per Share when calculating the Share Price on any particular Dealing Day.

Notes to the Financial Statements (continued)

5. Capital and Reserves (continued)

Redeemable Participating Shares (continued)

Swing Pricing (continued)

Swing pricing, where applied, aims to ensure that the burden of the costs associated with dealing in a Fund's Shares are borne by the investors that actually request those Share deals on a particular Dealing Day, and not by the Shareholders in a Fund who are not trading in the Shares on the relevant Dealing Day. In this way swing pricing aims to mitigate the adverse effects of dilution on Fund assets and to preserve and protect the value of shareholdings.

The swing factors applied during the financial period ended 30 September 2025 ranged from 0.28 bps to 47.09 bps (31 March 2025: 0.16 bps to 50.09 bps) on both subscriptions and redemptions.

The activity on Redeemable Participating Shares for the financial period ended 30 September 2025, the financial year ended 31 March 2025 and the financial period ended 30 September 2024 is as follows:

* Fund launched on 15 May 2025, therefore, there are no comparatives for this Fund.

** Fund fully redeemed on 26 June 2025.

*** Fund launched on 7 July 2025, therefore, there are no comparatives for this Fund.

**** Fund fully redeemed on 30 September 2025.

See Note 15 for information on the launch and termination dates of the above share classes.

6. Net Asset Value

The NAV per Share of any class of Shares in a portfolio is determined by dividing the value of net assets of the Fund by the total number of Redeemable Participating Shares in issue as at 30 September 2025, 31 March 2025 and 30 September 2024. The information disclosed in the following tables for all of the Company's Funds as at 30 September 2025, 31 March 2025 and 30 September 2024 is in line with the information as calculated in accordance with the Prospectus (published NAV). Please refer to Note 17 for details explaining differences between the NAV per the financial statements and the published NAV. The NAV and NAV per Share in the following tables are stated in the currency of the relevant class.

As at 30 September 2025, 31 March 2025 and 30 September 2024, there were no swing prices applied to the NAV valuation to any of the Funds. However, there were swing adjustments applied across various Funds during the financial period ended 30 September 2025, financial year ended 31 March 2025 and financial period ended 30 September 2024.

Shares are issued and redeemed at a single price, being the NAV per Share of the relevant class, which may be adjusted as described below.

Certain costs are customarily incurred when a Fund has to buy or sell portfolio assets in order to satisfy or give effect to requests for subscription or redemption of its Shares. The incurring of such dealing costs by a Fund can result in a Fund's value being diminished or 'diluted' over time and can, therefore, have a disadvantageous effect on Shareholders' interests in a Fund if counteracting steps are not taken. With a view to offsetting the effects of dilution to the extent deemed appropriate in the interests of Shareholders, the Directors may determine at their discretion, to adjust ("swing") the NAV per Share when calculating the Share Price on any particular Dealing Day.

Swing pricing, where applied, aims to ensure that the burden of the costs associated with dealing in a Fund's Shares are borne by the investors that actually request those Share deals on a particular Dealing Day, and not by the Shareholders in a Fund who are not trading in the Shares on the relevant Dealing Day. In this way swing pricing aims to mitigate the adverse effects of dilution on Fund assets and to preserve and protect the value of shareholdings.

7. Exchange Rates (continued)

The following financial period/year/period end exchange rates have been used to translate financial assets and financial liabilities in other currencies to GBP:

Exchange Rates against GBP	30 September 2025	31 March 2025	30 September 2024
Australian Dollar	2.0325	2.0673	1.9338
Canadian Dollar	1.8717	1.8589	1.8082
Euro	1.1455	1.1946	1.2011
Hong Kong Dollar	10.4659	10.0517	10.3933
Japanese Yen	198.8905	193.7495	192.1532
New Zealand Dollar	2.3198	2.2752	-
Swiss Franc	1.0706	1.1428	1.1315
US Dollar	1.3449	1.2917	1.3370

The following financial period/year/period end exchange rates have been used to translate financial assets and financial liabilities in other currencies to JPY:

Exchange Rates against JPY	30 September 2025	31 March 2025	30 September 2024
British Pound	0.0050	0.0052	0.0052
Euro	0.0058	0.0062	0.0063
US Dollar	0.0068	0.0067	0.0070

The following average exchange rates have been used to translate Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders balances in other currencies to USD:

Average Exchange Rates against USD	30 September 2025	30 September 2024
British Pound	0.7452	0.7799
Euro	0.8686	0.9186
Japanese Yen	146.0205	151.8686

8. Cash at Bank and Bank Overdrafts

Cash at bank and bank overdrafts as of 30 September 2025 and 31 March 2025 comprise of cash balances held with the Depositary's global sub-custodian, State Street Bank and Trust Company ("State Street"), net unrealised gains and losses on open spot foreign currency exchange contracts and overdrafts with banks. The Depositary may utilise one or more approved sub-custodians for holding cash of the Funds.

Cash collateral may also be received by the Funds in respect of repurchase agreements held by the Funds at the respective financial period/year end. There were no cash collateral held or received by any of the Fund as at 30 September 2025 and 31 March 2025.

Cash account arrangements are in place in respect of the Company and the Funds as a consequence of the requirements relating to the subscription and redemption collection accounts pursuant to the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48 (i)) Investor Money Regulations 2015 for Fund Service Providers ("Investor Money Regulations").

These cash accounts, held with Bank of America for collection of subscriptions, payment of redemptions and dividends for the Company are deemed assets of the Company and are included in the Statement of Financial Position.

9. Efficient Portfolio Management

The Company may, on behalf of any Fund and subject to the regulations and conditions imposed by the Central Bank, employ techniques and instruments relating to transferable securities and money market instruments, including investment in financial derivative instruments ("FDIs"). Such techniques and instruments may be used for efficient portfolio management purposes, or for hedging purposes or for direct investment purposes, where applicable. Such techniques and instruments may include investments in exchange-traded or over-the-counter FDIs, such as futures, forward foreign currency exchange contracts, options, swaps, credit-default swap indices, swaptions, credit-linked notes, convertible securities and warrants.

9. Efficient Portfolio Management (continued)

Efficient portfolio management means instruments and investment techniques involving transactions that are entered into for one or more of the following specific aims: the reduction of risk, the reduction of cost, or the generation of additional capital or income for a Fund. New techniques and instruments may be developed which may be suitable for use by the Company and the Company may (subject to the conditions imposed by the Central Bank) employ such techniques and instruments subject to the Supplement for the relevant Fund being updated and Shareholders being notified in advance. Where the Company intends to use these instruments for direct investment purposes, full details will be disclosed in the relevant Fund's investment policy. Where a Fund intends to engage in transactions involving FDI under any circumstances, the Company shall employ a risk management process in accordance with Central Bank requirements to enable it to monitor, measure and manage, on a continuous basis, the risk to all open derivative positions and their contribution to the overall risk profile of the Fund. Only such FDIs as are provided for in the current risk management process for the Company approved by the Central Bank may be used by the Company.

The Company entered into repurchase agreements for efficient portfolio management purposes. During the financial period ended 30 September 2025, the Funds earned interest income arising from repurchase agreements amounting to USD 912,234 (30 September 2024: USD 964,272) and is included in the Statement of Comprehensive Income.

10. Risk Management Policies and Procedures

The Funds' investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which they invest. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and Supplements for a more detailed discussion of the risks inherent in investing in the Funds.

The Directors review reports from the Investment Managers on a quarterly basis and more frequently as required in relation to the Funds' performance and risk profile. The Investment Managers are also responsible for ensuring that the Funds are managed within the terms of the Funds' investment guidelines and limits set out in the Prospectus' and Supplements as well as the Investment Managers' own internal investment guidelines and limits. The Directors delegate to the Manager who in turn delegates to the Investment Managers responsibility for the monitoring and managing of risk for the Funds.

There is a Risk Management Team responsible for overseeing the risk management process of the Investment Managers. Risk Management is delegated to the respective risk team in either the country of operation of the relevant Investment Manager or where not available, Lazard Asset Management LLC. The Manager's Chief Risk Officer along with various relevant committees review and monitor all Funds to ensure they remain consistent with their stated goals and objectives in terms of product characteristics, performance and risk meaning that the Funds are managed in line with client expectations and their legal and constitutional regulations.

The following paragraphs outline procedures undertaken to manage the market, credit and liquidity risks of the Funds. These are consistent with the procedures and risks that existed as at 31 March 2025.

Market Risk

Market risk arises mainly from uncertainty about future values of financial instruments held specifically from price, currency and interest rate movements. It represents the potential loss the Funds might suffer through holding market positions in the face of market movements.

(i) Market Price Risk

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. The Funds are exposed to market price risk arising from its investments in securities. By diversifying the portfolio, the risk that a price change of a particular investment will have a material impact on the Company is controlled. The Investment Managers and the Manager's Designated Person for Fund Risk Management manage the Funds' market risk on a daily basis in accordance with the Fund's investment objective, policies and core philosophy. The core philosophy of total performance measurement entails the active management of return, risk and cost. Relative-to-benchmark risk is controlled through the construction of diversified portfolios where exposures to certain market features (such as capitalisation or industry) are limited. All of the securities (excluding derivatives) were designated at fair value through profit or loss at the financial period end.

The Company does not currently use FDIs for efficient portfolio management purposes. However, a number of the Funds use forward foreign currency exchange contracts for portfolio and share class hedging and investment purposes. Details of forward foreign currency exchange contracts held as at 30 September 2025 are included in the Portfolio of Investments. The Company uses the commitment approach to measure global exposure for the Funds which hold forward foreign currency exchange contracts.

10. Risk Management Policies and Procedures (continued)

Market Risk (continued)

(ii) Foreign Currency Risk

The Funds may invest in securities denominated in currencies other than its functional currency (or, indeed, the currency of the investor). Furthermore, the Funds may invest in forward foreign currency exchange contracts for the purpose of implementing investment views and/or share class hedging purposes. Consequently, the Funds are exposed to risks that the exchange rate of its reporting currency relative to other currencies may change in a manner that has an adverse effect on the value of the portion of the Fund's assets that are denominated in currencies other than its own currency. Currencies may also move in such a way as to cause losses on forward foreign currency exchange contracts.

For the Funds in which currency risk is hedged out, the currency risk is managed by regular rebalancing of the forward foreign currency exchange contracts to maintain zero (or close to zero) currency exposure. For those Funds for which currency exposure is a critical source of return, exposures are managed relative to the appropriate benchmark. For other portfolios, there is no explicit currency management policy.

(iii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in prevailing interest rates. The Funds are exposed to interest rate risk through its investments in securities with fixed and floating rates of interest held within bond Funds. The Investment Managers manage the Funds' interest rate risk on a daily basis in accordance with the Funds' investment objectives, policies and core philosophy.

Geo-Political Risk

Fund portfolios may incur losses due to declines in one or more markets in which it invests. These declines may be the result of, among other things, political, regulatory, market, economic or social developments affecting the relevant market(s). To the extent that such developments impact specific industries, market sectors, countries or geographic regions, a Fund's investments in such industries, market sectors, countries and/or geographic regions can be expected to be particularly affected, especially if such investments are a significant portion of its investment portfolio. In addition, turbulence in financial markets and reduced liquidity in equity, credit and/or fixed income markets may negatively affect many issuers, which could adversely affect a Fund. Global economies and financial markets are increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers worldwide. As a result, local, regional or global events such as war or military conflict, acts of terrorism, the spread of infectious illness or other public health issues, social unrest, supply chain disruptions, market manipulations, government defaults, government shutdowns, the imposition of sanctions and other similar measures, recessions or other events could have a significant negative impact on global economic and market conditions. Additionally, general market conditions may impact the value of a Fund's securities, including changes in interest rates, currency rates or monetary policies.

Credit Risk

Credit risk is the risk that the counterparty or issuer to a financial instrument will fail to discharge an obligation or commitment that it has entered into with each Fund. The Company is exposed to credit risk via the Funds that invest in fixed income securities, investment funds and repurchase agreements.

All transactions involving transferable securities are settled upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet their obligations.

Substantially all of the cash and securities held in the Funds are held via the Depositary, except for the repurchase agreements and FDIs that are held with counterparties as disclosed on the Portfolios of Investments. State Street act as the global sub-custodian for the Depositary.

While cash held by the global sub-custodian and the Depositary is identifiable as belonging to the Funds, the Funds will be exposed to the credit risk of the financial institution where cash is deposited. In the event of insolvency of the financial institution, the Funds will be treated as a general creditor of the financial institution in relation to cash holdings of the Funds.

10. Risk Management Policies and Procedures (continued)

Credit Risk (continued)

In circumstances such as the insolvency of a sub-custodian or registrar, or retro-active application of legislation, the Funds may not, in all cases, be able to establish title to investments made and may suffer losses as a result. The Funds may find it impossible to enforce its rights against third parties. In addition, as the Funds may invest in markets where custodial and/or settlement systems are not fully developed, there is a transaction and custody risk involved in dealing in such markets. In certain circumstances, a Fund may not be able to recover some of its assets. Such circumstances may include any acts or omissions or the liquidation, bankruptcy or insolvency of the sub-custodian, retroactive application of legislation and fraud or improper registration of title. The costs borne by a Fund in investing and holding investments in such markets will generally be higher than in recognise securities markets.

The Funds' securities are always separately identified on the accounting records of the Depositary, therefore, the rights with respect to those securities are preserved. Thus, in the event of insolvency or bankruptcy of the Depositary, the Funds' securities are segregated and protected and this further reduces counterparty risk.

Bankruptcy or insolvency by the Depositary may cause the Funds' rights with respect to the cash and the securities held by the Depositary to be delayed or limited. The Funds monitor their risk by monitoring the credit quality and financial position of the Depositary that the Funds use. The Standard & Poor's credit rating of the parent company of the Depositary as at 30 September 2025 and 31 March 2025 is A for long term deposits.

The extent of the Funds' exposure to credit risk in respect of the financial statements approximates the carrying value as recorded in the Funds' Statement of Financial Position. There were no past due or impaired assets as at 30 September 2025 or 31 March 2025.

Counterparty/Issuer Risk

The Funds are exposed to a credit risk to parties with whom they trade and will bear the risk of settlement default. Counterparty/issuer risk is monitored and managed by a formal counterparty or issuer exposure management program within the Investment Managers.

The Investment Managers' approved list of counterparties is generally limited to the most highly rated and recognised dealers in their sectors. The Investment Managers perform ongoing monitoring of this list. Counterparty/issuer risk is monitored on an ongoing basis in the following manner:

- Approved broker selection – the trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness, financial strength, ability to enter into legally enforceable arrangements and standing in the financial community.
- Broker monitoring – performed through a variety of ongoing activities, including the assessment of certain regulatory filings and financial statements.
- Measurement and monitoring of counterparty or issuer trade exposure – a daily review of outstanding positions is performed.

A Fund is exposed to a credit risk on the over-the-counter ("OTC") counterparties with whom it trades, that these counterparties may not perform their obligations and that settlement of transactions may not occur. All OTC counterparties must meet the following criteria as set out in the Central Bank UCITS Regulations namely:

- (i) A credit institution in accordance with the Central Bank UCITS Regulations, or
- (ii) Have a minimum credit rating of A2 or equivalent, or in the opinion of the Investment Managers, an implied credit minimum rating of A2 or equivalent.

Exposures to individual counterparties are limited to 10% of NAV in the case of (i) above and 5% of NAV in the case of (ii) above.

All counterparties to the forward foreign currency exchange contracts are disclosed in the relevant Portfolio of Investments.

10. Risk Management Policies and Procedures (continued)

Counterparty/Issuer Risk (continued)

A number of the Funds can be also exposed to credit risk via their investment in Participatory Notes ("P-Notes"). P-Notes are financial instruments that may be used by the Funds to obtain exposure to an equity investment in a local market where direct ownership is not allowed. Investment in P-Notes may involve an OTC transaction with a third party. Investing in P-Notes may expose the Funds not only to movements in the value of the underlying equity but also to the risk of counterparty default, which may in the event of counterparty default result in the loss of the full market value of the equity. This exposure to counterparties is managed to the Central Bank UCITS Regulations exposure limits as detailed above. P-Notes generally are issued by banks or broker-dealers and are promissory notes that are designed to replicate the performance of a particular underlying equity security or market. The return on a P-Note that is linked to a particular underlying security generally is increased to the extent of any dividends paid in connection with the underlying security. However, the holder of a P-Note typically does not receive voting rights as it would if it directly owned the underlying security. At 30 September 2025 and 31 March 2025, none of the Funds held P-Notes.

Liquidity Risk

The Funds' assets comprise mainly of realisable securities which can be readily sold. Please note that the Funds abide by the ESMA liquidity guidelines. Certain securities held by a Fund may be difficult (or impossible) to sell at the time and at the price the relevant Investment Manager would like. A Fund may have to hold these securities longer than it would like and may forego other investment opportunities. There is the possibility that a Fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to that Fund. Funds that invest in certain small company securities, high-yield bonds, mortgage-backed securities or foreign or emerging market securities, which have all experienced periods of illiquidity, maybe subject to liquidity risks.

The main liability of the Funds is the redemption of any Shares that investors wish to sell. Shareholders have the right to require the Funds to redeem their Shares in the Funds on any business day subject to restrictions set out in the Prospectus. If total requests for redemption and/or switching on any dealing day for any Fund exceed 10% of the NAV of that Fund, each redemption or switching request in respect of Shares in such Fund may, at the discretion of the Directors, be reduced pro rata so that the total number of Shares of such Fund for redemption or switching on that dealing day shall not exceed 10% of the NAV of that Fund. Any redemption or switching request so reduced shall be carried forward to the next dealing day and effected in accordance with the Constitution on the following dealing day(s). The Funds have the ability to borrow in the short term to ensure settlement. No such borrowings have arisen during the financial period ended 30 September 2025 or during the financial year ended 31 March 2025.

The Funds' financial liabilities due for payment within one month relate in the most part, to security purchases awaiting settlements, redemptions of Redeemable Participating Shares and payment of expenses and bank overdraft interest. Details of these amounts where relevant, can be found in the Statement of Financial Position. There are no financial liabilities that fall due over 3 months except for the forward foreign currency exchange contracts whose maturity dates are outlined on the Portfolios of Investments at 30 September 2025 and 31 March 2025.

Concentration Risk

The Funds may be exposed to concentration risk when a Shareholder holds a significant portion of the issued share capital of the Funds as disclosed in Note 13.

Fair Value Measurement

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the valuation date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Notes to the Financial Statements (continued)

10. Risk Management Policies and Procedures (continued)

Fair Value Measurement (continued)

Level 2 inputs are inputs other than quoted prices in active markets included within level 1 that are observable for the asset or liability, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies. Level 2 inputs include the below points:

- a) Quoted prices for similar assets or liabilities in active markets.
- b) Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- c) Inputs other than quoted prices that are observable for the asset or liability (e.g., interest rate and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates).
- d) Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the Company's own assumptions about how market participants would be expected to value the asset or liability. Unobservable inputs are developed based on the best information available in the circumstances, other than market data obtained from sources independent of the Company and might include the Company's own data.

An investment is always categorised as level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgement and is specific to the investment.

All financial instruments for each Fund are level 1, apart from the financial instruments listed below which are level 2 as at 30 September 2025 and 31 March 2025:

* Fund launched on 15 May 2025, therefore, there are no comparatives for this Fund.

** Fund launched on 7 July 2025, therefore, there are no comparatives for this Fund.

Investments, whose values are based on quoted market prices in active markets, and therefore, classified within level 1, include active listed equities and investment funds. The Funds do not adjust the quoted price for these instruments. Financial instruments that do not have quoted market prices but are valued based on market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2, these include common stock, bonds, P-Notes, unlisted rights, repurchase agreements and forward foreign currency exchange contracts.

There were level 3 securities held on Lazard Emerging Markets Equity Fund, Lazard Emerging Markets Equity Advantage Fund and Lazard Emerging Markets Managed Volatility Fund as at 30 September 2025 and 31 March 2025 but fair valued at zero value. These level 3 securities were all Russian held securities.

Lazard MENA Fund, which fully redeemed on 28 May 2020, continues to hold positions in NMC Health Plc and National Gulf Ltd, which are fair valued at zero value and classified as level 3. The positions are untradeable and considered worthless.

11. Credit Facility

The Company entered into an unsecured credit facility ("Line of Credit") with State Street, to be utilised on a temporary basis for short-term liquidity purposes. The maximum amount of the Line of Credit available is USD 25,000,000 and the amount utilised by any Fund may not exceed 10% of that Fund's adjusted net assets. Each Fund will pay a commitment fee at the rate of 0.20% per annum on its pro-rata portion of the Line of Credit, which will be reflected as an expense in the Statement of Comprehensive Income. Interest on borrowings is charged at the applicable rate for the respective interest period plus a margin. There were no amounts drawn down from the Line of Credit during the financial period ended 30 September 2025. There was a drawdown of USD 31,594,348 on Lazard Emerging Markets Managed Volatility Fund from the Line of Credit during the financial year ended 31 March 2025.

12. Soft Commission Arrangements

The Investment Managers for the Company, in accordance with common market practice for investment managers entered into dealing arrangements with brokers whereby part of the dealing commissions paid to them are used to discharge the cost of investment related services supplied to them by the broker or by third parties. These services may be either market research or be related to the execution of trades on behalf of clients.

The Investment Managers place business with these counterparties including transactions relating to the Funds' investments. The Investment Managers will endeavour at all times to obtain best execution on all transactions for all clients including the Funds, and are satisfied that these arrangements are of benefit to the Funds. There were no soft commission arrangements during the financial period ended 30 September 2025 or during the financial year ended 31 March 2025.

13. Related Party Transactions

The authorised share capital of the Company is one Subscriber Share of par value of £1.00 and it is held by the Manager. All material related party transactions with the Manager and Directors are included in Note 3 to the financial statements. The fees and expenses of the Investment Managers, the Promoter and the Distributors are paid by the Manager out of its fee.

Directors

Andreas Hübner, Jeremy Taylor and Andrew Finucane are full time executives of the Lazard Group as well as Directors of the Company and also directors of the Manager. Andreas Hübner, Jeremy Taylor and Andrew Finucane are not entitled to any Directors' fees. Directors' fees charged during the financial period ended September 2025 amounted to USD 39,352 (30 September 2024: USD 37,266), of which USD Nil (31 March 2025: USD Nil) remained payable at the financial period/year end.

Connected Person Transactions

In accordance with the requirements of the Central Bank UCITS Regulations 43(1), any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodians appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the Shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis. Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section of the Directors' Report of the audited financial statements for the financial year ended 31 March 2025 and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Board. Further, Shareholders should refer to the Prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions.

Shareholders should also refer to the provisions of the Prospectus dealing with conflicts of interest. Therefore, having regard to confirmations from the Company's management and its relevant delegates, the Directors of the Company are satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by the Manager) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Manager through regular updates to the Directors.

Details of fees paid to related parties and certain connected persons are set above and out in Note 3 to the financial statements. However, Shareholders should understand that not all "connected persons" are related parties as such latter expression is defined by Section 33 of FRS 102.

Notes to the Financial Statements (continued)

14. Distributions

Distributions will not be paid in respect of any class of share which is an accumulating class. Income and profits, if any, attributable to an accumulating share class will be accumulated and reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the NAV of the relevant accumulating Share class.

The below distributions were paid to the Shareholders of AM Dist GBP class in the Lazard Global Listed Infrastructure Equity Fund on monthly basis during the financial period ended 30 September 2025:

* Fund launched on 15 May 2025.

** Fund launched on 7 July 2025.

Distributions will not be paid in respect of any class of Share which is an accumulating class. Income and profits, if any, attributable to an accumulating share class will be accumulated and reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the NAV of the relevant accumulating share class.

There are no other significant events affecting the Company since the financial period end.

17. Reconciliation Of Financial Statements NAV To Published NAV

As at 30 September 2025, the NAV for Lazard Global Listed Infrastructure Equity Fund per the financial statements was inclusive of subscription of GBP 10,408,531, the NAV for Lazard European Equity Fund per the financial statements was inclusive of redemption of EUR 5,082,496 and the NAV for Lazard Japanese Strategic Equity Fund per the financial statements was inclusive of subscription of JPY 1,493,440,995.

As at 31 March 2025, there were no adjustments, which were posted to the Funds after the last published NAV had been finalised.

Lazard Global Listed Infrastructure Equity Fund at 30 September 2025	Total
	GBP
NAV per financial statements	1,395,919,609
Subscription not reflected in the published NAV	10,408,531
Published NAV (in accordance with the Prospectus)	1,385,511,078

Lazard European Equity Fund at 30 September 2025	Total
	EUR
NAV per financial statements	-
Redemption not reflected in the published NAV	5,082,496
Published NAV (in accordance with the Prospectus)	5,082,496

Lazard Japanese Strategic Equity Fund at 30 September 2025	Total
	JPY
NAV per financial statements	281,739,315,318
Subscription not reflected in the published NAV	1,493,440,995
Published NAV (in accordance with the Prospectus)	280,245,874,323

Statement of Major Changes in Investments

In accordance with the Central Bank UCITS Regulations, a statement of largest changes in the composition of the Portfolios of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Funds. These are defined as the aggregate purchases and sales of an investment (including maturities but excluding repurchase agreements, overnight discount notes and time deposits, which are employed chiefly as a means of seeking to ensure efficient portfolio management) exceeding 1.00% of the total value of purchases and sales for the financial year. At a minimum, the largest 20 purchases and sales are listed. If the Fund entered into less than 20 purchases or sales during the reporting period, then all transactions are presented.

Securities Financing Transactions Regulation Appendix

Article 13 of Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") on transparency of securities financing transactions ("SFTs") and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

1. Market value of assets engaged in securities financing transactions as at 30 September 2025

Below is the market value of assets engaged in SFTs as at 30 September 2025. The assets which are engaged in SFTs at this date are repurchase agreements, which are settled bilaterally.
