LAM's Interpretation of Significant Votes for SRD II

We define “significant” votes as those that meet one or more of the following criteria:

1. Votes against management

Indicating where we have identified poor governance practices, and we are using our vote to hold companies to account for higher governance standards.

2. Shareholder proposals

Addressing human and natural capital considerations, as well as management-proposed Say on Climate votes.

3. Meetings marked as significant by LAM's investment professionals

For example, companies where they have actively engaged on governance, or their analysis has identified a material issue such as a significant board change, controversy, or relevance to an investment thesis.

For the purposes of this report, we have also added an additional criteria to reflect a materiality threshold, set at 2%, i.e. 2% shareholding applied to meetings, aligning with two of our key governance principles: director elections, focusing on Board independence, accountability, and composition; and the review of executive compensation to ensure that management pay is fair, transparent, and aligned with long-term shareholder value.

Appendix

Rationale Description

- 1. Routine Items:** Lazard Asset Management (LAM) generally votes routine items as recommended by the issuer's management and board of directors, based on the view that management is generally in a better position to assess these matters. LAM considers routine items to be those that do not change the structure, charter, bylaws, or operations of an issuer in any way that is material to long-term shareholder value.
- 2. Board Composition and Structure:** LAM considers board composition and structure issues to relate to the board of directors, composition of its committees and structure of the board. Generally, LAM votes in favor of provisions that will increase effectiveness of the issuer's board of directors. LAM generally votes against proposals intended to entrench independence of the board, or where the conduct of the board is not aligned with shareholder expectations.
- 3. Changes to Capital Structure:** LAM generally believes that decisions regarding investing financial products and raising additional capital for business reasons/cash flow are best left to management but will monitor such issues to ensure that they are aligned with the long-term interests of shareholders. Generally, LAM votes in favor of management proposals related to increases or decreases in common or preferred stock, stock splits and dividends. LAM generally votes against changes in capital structure designed to be used in poison pill or the provision of loans to clients or controlling shareholders of the company.
- 4. Executive Compensation:** LAM supports efforts by companies to adopt compensation and incentive programs to attract and retain the highest calibre management possible, and to align the interests of a board, management and employees with those of long-term shareholders. LAM generally favors programs intended to reward management and employees for positive and sustained, long-term performance.
- 5. Environment Social and Corporate Governance:** As set out in Sustainable Investment and ESG Integration Policy, LAM is committed to an investment approach that incorporates human and natural capital and specifically climate considerations in a comprehensive manner in order to safeguard the long-term interests of our clients and to manage more effectively long-term investment risks and opportunities related to. human, natural capital matters.
- 6. Shareholder Proposals:** LAM believes in the ability of shareholders to leverage their rights related to the use of shareholder proposals to address deficits in best practices and related disclosures by companies. Many natural, human capital and governance issues are improved through such use of shareholder proposals. LAM generally votes on environmental, climate, social, and corporate governance proposals in a way that we believe will increase long-term shareholder value. Supporting shareholder proposals is one of several stewardship tools and can be used effectively as a catalyst to improve company practices. However, the quality of proposals can vary significantly, so we review on a case-by-case basis. To enable to do this consistently, LAM developed a framework for ESG-related shareholder proposals that leverages both the company knowledge of Lazard's fundamental research analysts and the subject matter expertise of the LAM's Sustainable Investment & ESG team. Several principles are used to help guide voting on ESG-related shareholder proposals to ensure consistency in voting decisions, including financial materiality, progress, transparency, acknowledging asymmetric knowledge between corporates and investors, and an expectation of responsible conduct.
