Composite Description

The composite returns represent the total returns of all fully discretionary portfolios with an International Quality Growth mandate. The Lazard International Quality Growth strategy seeks to generate strong relative returns over a full market cycle. We seek to invest in companies which can sustain strong financial productivity while reinvesting in their businesses and which are trading at attractive valuations. The strategy typically invests in non-US companies, including those from emerging markets, with a market capitalization generally of \$3 billion or greater. The emerging markets equity allocation is implemented by investing in individual securities. The strategy is measured relative to the MSCI AC World ex-US index.

Calculation of Performance Returns

The composite returns are reported net of foreign withholding taxes on dividends, interest and capital gains. The composite returns presented represent past performance and is not a reliable indicator of future results, which may vary.

Fee Schedule

Lazard’s standard fee schedule for International Quality Growth accounts is 0.75% on the first \$100 million of assets and 0.50% on the balance. (This fee schedule may be presented in non-U.S. local currency equivalents based on prevailing exchange rates.) The management fee schedule and total expense ratio for the collective trust is 0.50% and 0.60%, respectively. Composite net-of-fees returns are calculated by reducing monthly composite returns by the 12th root of the stated strategy fee's highest tier.
