Composite Description

The composite returns represent the total returns of all fully discretionary portfolios with a Lazard Emerging Markets Equity Advantage investment mandate. From January 2016 to September 2021, the composite minimum was \$10 million. Prior to January 2016, the composite had no minimum. The Lazard Emerging Markets Equity Advantage strategy seeks to outperform the MSCI Emerging Market Index over a market cycle using a proprietary, quantitatively driven bottom-up stock selection process. Each stock is evaluated daily according to four independent measures: growth, value, sentiment, and quality. The strategy typically invests in securities of companies all of which are domiciled in the emerging market countries contained in the benchmark. The portfolio is constructed to closely resemble the characteristics of the MSCI benchmark including sectors, geography, and market capitalization.

Calculation of Performance Returns

The composite and benchmark returns are reported net of foreign withholding taxes on dividends, interest and capital gains. The composite returns presented represent past performance and is not a reliable indicator of future results, which may vary. A complete list and description of all Lazard composites and pooled funds is available upon request.
