Composite Description

The composite returns represent the total returns of all fully discretionary portfolios with a Developing Markets Equity investment mandate. The Lazard Developing Markets Equity strategy seeks to generate strong relative returns over a full market cycle through the process of bottom-up stock selection and by assessing the trade-off between forward earnings growth rates and valuations for an individual security.

Calculation of Performance Returns

Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request. The composite and benchmark returns are reported net of foreign withholding taxes on dividends, interest and capital gains. The composite returns presented represent past performance and is not a reliable indicator of future results, which may vary. The composite inclusion criterion includes accounts that have the ability to purchase issuers' ordinary shares. These accounts may also invest in US denominated equity securities of US and non-US companies. A complete list and description of all Lazard composites and pooled funds is available upon request.

Fee Schedule

Lazard's standard fee schedule for Developing Markets Equity accounts is 1.0% on the first \$100 million of assets and 0.80% on the balance. (This fee schedule may be presented in non-U.S. local currency equivalents based on prevailing exchange rates.) Composite net-of-fees returns are calculated by reducing monthly composite returns by the 12th root of the stated strategy fee's highest tier.
